Continuously striving to improve, **adding real value** and **severely disrupting vehicle crime and fraud**, Zonke-Unicode has invested in an **innovative new feature** and added functionality to the system. Another value added service included in your subscription.
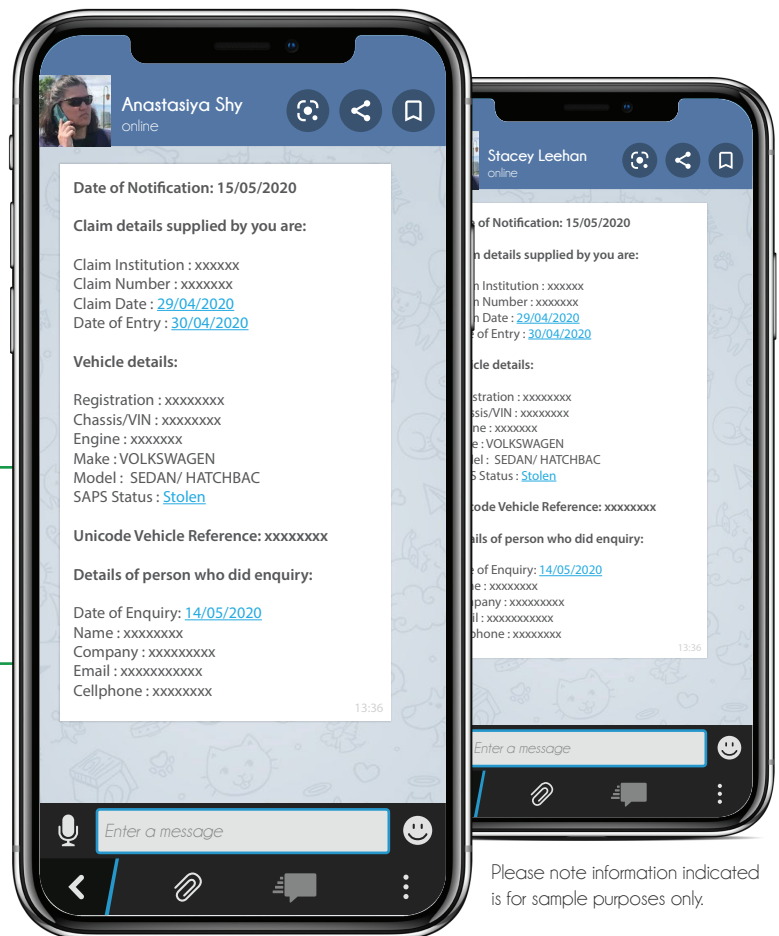

Out of Portfolio

Now for the first time ever, as a portfolio owner, should the SAPS, Law Enforcement Officers or accredited Zonke-Unicode users test a vehicle in your portfolio, you will be notified. This unique new feature ensures that no matter which user tests a vehicle in your portfolio you receive the alert and the recovery process will begin.

This new functionality ensures 100% transparency and improves governance, significantly increasing the speed of detection.

Now portfolio owners have a much broader field of investigators and eyes on the street with this new feature, Out of Portfolio Notifications extends the probability of your vehicle being queried, detected and in turn recovered.
